

Postcolonial Interventions (ISSN 2455-6564)

Call for Papers

Vol. VI, Issue 1 (January 2021)

Postcolonial Interventions will be publishing a curated volume on Postcolonial Knowledges for the January 2021 issue (Vol. VI, issue 1), to be edited by Kerstin Knopf. The issue will be a collection of articles first presented at the Third Bremen Conference on Language and Literature in Colonial and Postcolonial Contexts, titled *Postcolonial Knowledges*, organized at the University of Bremen in March 2016. It brings together contributions from literary, cultural, and language studies to explore how knowledge systems and traditions are affected by colonial and postcolonial conditions, which are in turn increasingly marked by contradiction, heterogeneity, and transculturalization. The authors examine ways in which colonial and postcolonial constellations have been reflected, shaped, and negotiated through symbolic and discursive knowledge practices.
